

Feature Rich Contact Center, iPECS CCX

iPECS CCX is for all business types. Whether you are small, medium or a large enterprise, whether you are in one office or in various geographical locations or utilising remote workers, you can now offer the key requirements for successful and modern customer experience.

Presence status display

iPECS CCX has iPECS CCX Desk modular feature integrated as default that enables your PC experience seamless when engaging your customer with full support service. With the iPECS CCX desk, users can quickly and easily update their status to any one of the options predefined by the administrator.

It displays the status of other users and how long they have been away. If a user wishes to contact another user who is currently unavailable, they can message them or even set an alert to identify when that user becomes available.

Contact detail DB integration

iPECS CCX Desk allow agents to access the caller's detail immediately, enabling them to answer with a warmer, more professional welcome.

By integrating into your Customer Relationship Manager (CRM) or database, calls are automatically matched with contacts in your system and the customers information is presented in a screen-pop right on the agents' desktop.

When used in conjunction with Outlook, CRM or a database, previous calls are logged and all the customer history (including recorded calls where applicable) are easily accessible at the click of a button.

Call management

Calls can be answered, put on hold and transferred with the click of a button. This intuitive and flexible system ensures an efficient and cost-effective platform for your organization, whilst providing the highest quality customer experience. Agents can receive incoming calls' automatic screen-pop with caller's details.

Transform your business instantly with iPECS CCX simplifying your business infrastructure and enhancing your customer experience.

Business intelligence reporting

iPECS CCX has a powerful and intuitive reporting solution. It is easy to build and use with inline explanations for data elements and column.

The solution offers enhanced reporting tools for comprehensive and tailored analysis such as system performance, service levels, grades of service and team evaluation with powerful filtering feature.

Reports may be set to be emailed automatically on your own schedules and delivered directly to your email, or run ad-hoc reports and create your own filters for deep analysis of your business and team performance.

Measure your business metrics

Measure staff efficiency to improve productivity and customer service. Tracking account codes for project and item billing will give you insights in managing your business.

With automatic report scheduling you can manage workflows when you print, email or export to file (CSV, PDF, Excel). In addition, Multi-user and multi-site support will give you the seamless monitoring experience.

Supervisor's monitoring tool

Due to the flexible web based architecture, supervisors can log in and monitor their teams from anywhere using the powerful tools integrated into iPECS CCX Desk with iPECS CCX Report Plus, all included in iPECS CCX as a default.

Supervisors can see a log of all the calls made or taken by each agent and when used in conjunction with iPECS CCX Record, individual calls can be played back at the click of a button. Including iPECS CCX Record, there are many modular features that can be additionally integrated to the solution.

A modular suite of customer experience applications tailored to your business

iPECS CCX technology is a modular range of customer experience applications enabling you to pick and choose what works for you. These can be delivered individually or integrated together for a complete business solution.

CCX Call

iPECS CCX Call is the Evolution of the outbound contact centre with true omni-channel reach. A blended environment that means your team connect with more people and create more opportunities.

CCX IVR

Allow your customers to save human resources for complex and more personal tasks. iPECS CCX IVR is a powerful Interactive Voice Response Engine and Management Module that offers sophisticated features and a highly configurable IVR designer tool.

CCX PCIM

Protect and selectively display your personal information. iPECS CCX PICM provides security to protect personal information.
