iPECS Cloud Benefits

Save costs without compromise

iPECS Cloud will set you free from complexity and concerns over your resource utilization for business communications. No more outdated hardware to maintain or replace. Just a no-fuss cloud communication system that stays up-to-date. As your business grows, you can easily expand the capacity and features, and applications of your communication solution optimized and customized for your business needs. Letting your communication be simple and future proof, you can focus on your core business with your money and time saved.

Flexible deployment scenario

Businesses have different communication environment and needs. iPECS Cloud can be deployed in various environments as all public, private or hybrid cloud. Deploy the best fit for your network transformation. Whether you're moving to cut costs or boost performance, migrating to a new cloud means taking advantage of enhanced speed, reliability, and security. If you plan to expand, iPECS Cloud will expand with you. Enjoy one-size-fit-all scalability from a solution that benefits businesses of all sizes.

Work together anywhere

The most productive teams cite being able to work with versatility as the key to their success. The iPECS Cloud suite of features offers unparalleled versatility. iPECS Cloud allows users to enjoy robust call features such as call transfer, hot desk, mobile extension etc. With collaboration applications such as 'iPECS ONE', all-in-one UC & Collaboration solution, you can easily collaborate among colleagues in real-time with multi devices and conduct video conference for presentations and file sharing. Empower your team with cloud collaboration tools that make working together easy.

Improve your customer experience

You may have experienced missing an important business call while you're out of office. Having continuity in your business communication is very important for your customer satisfaction. iPECS ONE enables users, regardless of location, to access iPECS Cloud from a browser or smartphone app delivering all of the features needed to communicate via voice, video or chat. Collaboration over video with colleagues or customers becomes just another button click on a browser or smartphone app. Deliver better customer service with iPECS Cloud.

Powerful Management Tool

iPECS Cloud incorporates a multi-layered management tool for reducing time and operation expenses. The management GUI which is web based is easy and intuitive management tool for all resources. The Back-end portal is for iPECS Cloud business partners for configuring and ordering of all services, with the billing gateway management by business partners. For the customer IT manager and end-user the front-end portal is used for all layers management. Get your team trained quickly, thanks to our easy-to-learn, intuitive interface that looks and acts the same on any device.

Self-manage and configure your devices

With today's complex enterprise business solutions and with limited IT resources, it may be difficult to manage all end users' change request. IT managers can divide the editing access by features and assign to the appropriate end users for a more flexible and customizable business environment. The end users can also manage their own configuration through the web browser wherever they are, boosting productivity of both your IT staff and the end user.
