

The only app you need for all your business communications, iPECS ONE

Creating a digital workplace has never been simpler than through one application that does it all. Work together seamlessly with your team using advanced tools for calls, chat and collaboration from anywhere, at anytime.

Unified Collaboration

- iPECS call handling
- Instant Messaging
- Video Conferencing

Superior User Experience

- Automated Provisioning
- Easy-to-use interface
- Global search

Web Technology

- Voice, Video, Sharing on WebRTC
- Access from anywhere
- Always up-to-dated client

Open Architecture

- Web API for 3rd party apps
- Integration with well-known CRMs

Chat

Instant messaging is a key feature for every team. iPECS ONE allows users to set up multiple chat rooms on a personal or group basis. These chat rooms are persistent and allow staff to instantly reach colleagues or business partners. Share files or photos while chatting with other users or groups, and express yourself with emoticons. Your conversations are synchronized across multiple devices. With iPECS ONE, you can stay connected with your team and communicate anywhere, anytime.

Collaborate

Collaborate quickly and efficiently with iPECS ONE Spaces, a virtual collaboration workplace for HD video conferencing, instant messaging and sharing. You can simply create spaces for team collaboration and invite your colleagues and customers. iPECS ONE allows you to access all of your communications securely in real time, no matter where your team are based. Work together seamlessly with your team using iPECS ONE's collaboration features.

Call

Enjoy a wide range of call features in iPECS ONE, supported by iPECS Cloud. Simplify your communications using robust call features such as Call Transfer, Call-Back, Pick-up Groups, Voicemail, Call Recording, and Ad-hoc conferences. Your iPECS ONE client can also be used as a phone control client for users who prefer to use a desktop phone as their primary device with a microphone and speaker rather than a soft-client. Manage calls effectively and access clear audio with iPECS ONE.

Simplicity

An intuitive interface is just the start of iPECS ONE's ease of use features. A personal dashboard keeps you informed about the data you need to know, while global search features allow you to find the data you need quickly, from contacts to individual messages. Automated provisioning is another benefit to iPECS ONE users, saving time spent onboarding and frees your team from the stress of service activation.

Conference

iPECS ONE's video and audio conference features allow for simple business collaboration anytime, anywhere. From 1:1 to multi-party, diverse forms of conferencing can be carried out through your iPECS ONE client. Simply choose the best fit for any situation from a variety of conferencing options, an intuitive user interface makes the process easy. This can drastically reduce the need for time-intensive and costly offline meetings and will allow businesses to focus on other high-priority tasks.

Extendability

iPECS ONE has been built on open platform that could allow access from 3rd party applications using iPECS ONE client API. The iPECS ONE Clients run on ONE Client Web API which will be used for 3rd party app development. iPECS ONE also supports Integrations with well-known CRMs such as Salesforce, Microsoft Dynamics and Goldmine. Deliver better customer service and increase business productivity using customer information from your CRM.

Key Features
